PROFESSIONAL SUMMARY

Product builder and Sociology researcher who can translate complex digital products into clear user problems, workflows and value propositions. I bring six years of crypto-market knowledge, research on youth and digital economies, business reporting experience, and hands-on product concept work across education, accounting and crypto analytics. My role has been product direction and refinement, while a technical cofounder handled coding.

SELECTED PRODUCT WORK

Sifter LevelUp

Product Co-builder | Nov 2025-present

- Shaped the concept and product direction for a Duolingo-style learning app focused on crypto literacy and quant finance.
- Defined learning paths, lesson structure, progress experiences, career guidance and user-facing product flows.
- Used AI-assisted building and iterative product refinement with a technical cofounder who handled production coding.

LedgerLens

Product Co-builder | Nov 2025-present

- Defined a mobile-first, offline-capable evidence-to-books product for informal and semi-formal businesses.
- Mapped workflows for paper, voice, photo, PDF and screenshot capture into sales, stock, cash, credit, reconciliation and reporting records.
- Refined the product around evidence preservation, focused corrections, exception handling and auditability; technical implementation was led by a cofounder.

SNA Demo

Product and Concept Co-builder | Nov 2025-present

- Shaped a Solana token analytics prototype covering wallet monitoring, caller analysis, paper trading, leaderboards and Telegram alerts.
- Applied six years of crypto market knowledge to user scenarios, risk considerations and product-behavior refinement.
- Presented accurately as a portfolio prototype; production coding was handled by the technical cofounder.
